

***Ornithodoros tartakovskyi*, Uninfected Nymphs (Live)**

Catalog No. NR-48931

This reagent is the tangible property of the U.S. Government.

For research use only. Not for human use.

Contributor:

Michelle Michalski, Filariasis Research Reagent Resource Center Director of Communication/Project Liaison, Professor, University of Wisconsin Oshkosh, Oshkosh, Wisconsin, USA

Manufacturer:

Filariasis Research Reagent Resource Center supported by Contract HHSN272201000030I, NIH-NIAID Animal Models of Infectious Disease Program¹

Product Description:

Classification: Argasidae, *Ornithodoros*

Species: *Ornithodoros tartakovskyi* (also referred to as *Ornithodoros tartakowskyi*)

Strain: FR3

Original Source: *Ornithodoros tartakovskyi* (*O. tartakovskyi*), strain FR3, was obtained from TRS Laboratories in Athens, Georgia, USA.²

Comment: *O. tartakovskyi* is used to maintain the life cycle of *Acanthocheilonema viteae* (*A. viteae*) at University of Wisconsin Oshkosh for the Filariasis Research Reagent Resource Center.²

O. tartakovskyi is a soft tick whose natural distribution includes central Asia, the former USSR and Iran. It usually resides in the burrows of rodents and tortoises, but it is also capable of feeding from humans. *O. tartakovskyi* vectors the filarial nematode *A. viteae*, as well as *Borrelia latyschewii* (a bacterial agent of tick-borne relapsing fever) and the Karshi and Langat viruses.^{3,4}

Material Provided:

NR-48931 consists of up to 15 live *O. tartakovskyi* uninfected nymphs. Actual numbers available for immediate shipment will be based on current inventory. If more material is required for your intended use, please contact BEI Customer Services at contact@beiresources.org to request the additional material.

Packaging/Storage:

NR-48931 is packaged in 7 or 9 dram plastic vials. These primary vials are secured inside a larger plastic secondary container, which is shipped in an insulated box inside a fiberboard box. This shipment is in accordance with the Arthropod Containment Guidelines Version 3.1 (The American Committee of Medical Entomology of the American Society of Tropical Medicine and Hygiene). All live *O.*

tartakovskyi orders are shipped overnight from University of Wisconsin Oshkosh, Oshkosh, Wisconsin, USA.

O. tartakovskyi should be housed in insect chambers set to 27°C and 80% humidity. All life stages of this tick feed quickly, and the life cycle can be maintained on artificial membrane feeding systems using rabbit blood (Hemostat Laboratories, Dixon, California, USA) instead of living hosts.

A video outlining the general process of maintaining and feeding *O. tartakovskyi* can be found at <https://www.youtube.com/watch?v=u1vMGlaRuAM>.

Questions regarding handling of *O. tartakovskyi* can be sent to Dr. Shelly Michalski at michalsk@uwosh.edu.

Citation:

Acknowledgment for publications should read “The following reagent was provided by the NIH/NIAID Filariasis Research Reagent Resource Center for distribution by BEI Resources, NIAID, NIH: *Ornithodoros tartakovskyi*, Uninfected Nymphs (Live), NR-48931.”

Biosafety Level: 1

Appropriate safety procedures should always be used with this material. Laboratory safety is discussed in the following publication: U.S. Department of Health and Human Services, Public Health Service, Centers for Disease Control and Prevention, and National Institutes of Health. Biosafety in Microbiological and Biomedical Laboratories. 5th ed. Washington, DC: U.S. Government Printing Office, 2009; see www.cdc.gov/biosafety/publications/bmb15/index.htm.

Disclaimers:

You are authorized to use this product for research use only. It is not intended for human use.

Use of this product is subject to the terms and conditions of the BEI Resources Material Transfer Agreement (MTA). The MTA is available on our Web site at www.beiresources.org.

While BEI Resources uses reasonable efforts to include accurate and up-to-date information on this product sheet, neither ATCC® nor the U.S. Government makes any warranties or representations as to its accuracy. Citations from scientific literature and patents are provided for informational purposes only. Neither ATCC® nor the U.S. Government warrants that such information has been confirmed to be accurate.

This product is sent with the condition that you are responsible for its safe storage, handling, use and disposal. ATCC® and the U.S. Government are not liable for any damages or injuries arising from receipt and/or use of this product. While reasonable effort is made to ensure authenticity and reliability of materials on deposit, the U.S.

Government, ATCC[®], their suppliers and contributors to BEI Resources are not liable for damages arising from the misidentification or misrepresentation of products.

Use Restrictions:

This material is distributed for internal research, non-commercial purposes only. This material, its product or its derivatives may not be distributed to third parties. Except as performed under a U.S. Government contract, individuals contemplating commercial use of the material, its products or its derivatives must contact the contributor to determine if a license is required. U.S. Government contractors may need a license before first commercial sale.
